PROCESS BIOCHEMISTRY

Volume 21 1986

Title and Author Index

Papers published in *Process Biochemistry* are refereed and the journal is abstracted by the major abstracting organisations in the field.

© The entire contents are copyright Turret-Wheatland Ltd. 1986

Title Index

A

Acetone-Butanol-Ethanol Fermentation, The: A Current Assessment, by B.M. Ennis, N.A. Gutierrez, and I.S. Maddox 131

Anaerobic Treatment of Coke Plant Waste Water, by F. Edeline, G. Lambert, and H. Fatticcioni 58

Anaerobic Treatment of Distillery Slops Using an Upflow Anaerobic Filter Reactor, by C.M. Silverio, P.G. Anglo, G.V. Montero, V. Pacheco, L. Alamis, and V.S. Luis Jr . . 192

Application of Glutaraldehyde Cross-linked Yeast Cells to the Continuous Phosphorylation of Glucose to Fructose 1.6 Diphosphate, by G.M. Bisso and F. Melelli 113

Application of Iso-Propanol-Butnol-Ethanol Mixtures as an Engine Fuel, by G.H. Schoutens, J.W. Groot, and J.B.W. Hoebeek 30

Application of Porous Membranes for Biomass Retention in Biological Wastewater Processes, by G.K. Anderson, C.B. Saw, and M.I.A.P. Fernandes 174

C

Comparative Coal Fines Desulphurisation using the Iron-oxidising Basterium *Thiobacillus ferrooxidans* and the Yeast *Saccharomyces cerevisiae* during Simulated Froth Flotation, by C.C. Townsley and A.S. Atkins 188

Comparative Mineral Sulphide Leaching in Shake Flasks, Percolation Columns, and Pachuca Reactors Using *Thibacillus ferrooxidans,* by A.S. Atkins, F.D. Pooley, and C.C. Townsley 3

Continuous Ethanol Production Controlled by Membrane Processes, by M.H.V. Mulder and C.A. Smolders . . 35

Continuous Ethanol Production from Jerusalem Artichoke Stalks using Immobilized Cells of *Klyveromyces marxianus,* by P. Bajpai and A. Margaritis 86

Critical Influence of Dissolved Oxygen on Glycerol Synthesis by an Osmophilic Yeast *Pichia farinosa,* by P.V. Kishore and N.G. Karanth 160

Cross Flow Immobilized Enzyme Reactor for the Hydrolysis of Whey, A, by M. López-Leiva and V. Gekas . . . 27

D

Dynamics of Oxygen Mass Transfer in Bioreactors. Part II: Design Variables by F. Vardar-Sukan 40

E

Economics of Primary Separation Steps in Relation to Fermentation and Genetic Engineering, by R. Datar . . . 19

Effect of the Relative Concentration of Ion Species on Yeast Growth and Ethanol Production, by R.P. Jones . . . 183

F

Fuel Ethanol Production – The US Experience, by J.E. Murtagh 61

G

Glycerol Production by Fermentation – A Review, by P. Vijakshore and N.G. Karanth 54

I

Immobilized Algae: A Review, by P.K. Robinson, A.L. Mak, and M.D. Trevan 122

Integrative Transformation by Filamentous Fungi with Respect to Biotechnological Application, by K. Esser and G. Mohr . . . 153

L

L-isoleucine Production by Ethanol Utilizing Micro-organisms, by H. Yukawa and M. Terasawa 196

M

***Micromonospora* Produced Aminoglycoside Antibiotics: Chemistry and Microbiology,** by J. Bérdy and M. Járai . 93

***Micromonospora* Produced Aminoglycoside Antibiotics: Chemistry and Microbiology: Part II,** by J. Bérdy and M. Járai . . . 103

N

New Approach to the Examination of Polysaccharide Modification in Commercial Wet Milled Barley and Malt Grists, A, by J.R. Stark and X.S. Yin 118

Nutritional Quality, Food Processing, and Biotechnology Aspects of Chitin and Chitosan: A Review, by D. Knorr . 90

O

Optimization Studies for Production of High Fructose Syrup from Jerusalem Artichoke using Calcium Alginate Immobilized Cells of *Kluyveromyces marxianus,* by P. Bajpai and A. Margaritis 16

P

Potential for Expert Systems in the Operation and Control of Activated Sludge Plants, The, by N.J. Horan and C.R. Eccles . . . 81

Practical and Theoretical Aspects of Inorganic Adsorbents Technology in Downstream Processing – A Review, by S. Green and D.A. Wase 200

Production of Biologicals from Animal Cells – An Overview, by A. Mizrahi 108

Production of Gluconic Acid from Whey Hydrosylate by *Gluconobacter oxydans,* by N. Van Huynh, M. Decleire, A.M. Voets, J.C. Motte, and X. Monseur 31

Production of L-Malic Acid by the Cell Reusing Process, by H. Yukawa, H. Yamagata, and M. Terasawa 164

Purification and Identification of a Trypsinlike Enzyme from the Pyloric Caeca of Cod, by D.H. Shin and R.R. Zall . 11

R

Role of Anaerobic Spore-forming Bacteria in the Acidogenic Fermentation of Glucose, by J.G. van Andel, A.M. Breure, and A. Cohen 45

S

SCP Production from Citrus Wastes by Using Constituted Mixed Fungal Inoculum, by S.S. Sukan and B.F.A. Yasin 50

Structure and Function of Linear Extrachromosomal DNA in Eukaryotes, by K. Esser and E. Kempken 69

T

Two-step Biodegradation of Lignin by Means of a Mixed Culture of Yeasts, by M. Glanser, L. Dvoracek, and S. Ban . . . 169

U

Understanding of the Forces in the Adhesion of Micro-organisms to Surfaces, An, by Chester S. Ho 148

Unified Design Approach to Fermentor Sterility and Containment, A, by C.H. Brooks and P.D. Russell . . . 77

Author Index

A

Alamis, L., V.S., Jr, Silverio, C.M., Anglo, P.G., Montero, G.V., and Pacheco, V. Anaerobic Treatment of Distillery Slops Using an Upflow Anaerobic Filter Reactor . . 192

Anderson, G.K., Saw, C.B., and Fernandes, M.I.A.P. Application of Porous Membranes for Biomass Retention in Biological Wastewater Processes 174

Anglo, P.G., Montero, G.V., Pacheco, V., Alamis, L., Luis, V.S. Jr., and Silverio, C.M. Anaerobic Treatment of Distillery Slops Using an Upflow Anaerobic Filter Reactor . . 192

Atkins, A.S., and Townsley, C.C. Comparative Coal Fines Desulphisation using the Iron-oxidising Bacterium *Thiobacillus ferrooxidans* and the Yeast *Saccharomyces cerevisiae* during Simulated Froth Flotation 188
